## **DETAILED ACTION**

### **Remarks**

In response to communications files on April 27, 2007, Claims 2, 6, 13, and 16 are amended by applicant's request. Therefore, claims 2-11, 13-16, 18, and 20 are presently pending in the application.

### ***Reasons for Allowance***

1. Claims 2-11, 13-16, 18, and 20 are allowed
2. The following is a statement of reasons for the indication of allowable subject matter: the prior arts of records, neither anticipates nor renders obvious the following limitations as claimed:

As to claims 2 and 13, the prior art of records fail to anticipate or suggest a computer-implemented method of transmitting streaming data, the method comprising:

streaming a video comprising previously-stored first video data and second video data from data storage to a user, and

receiving a request to fast-forward the video and detecting an attempt to bypass the second video data and, notwithstanding the request, streaming the second video data to the user;

wherein the first video data is stored on a first member of the data storage and the second video data is stored on a second member of the data storage, the user being enabled to fast-forward any video data stored on the first member and disabled from fast-forwarding any video

data stored on the second member, to transmit the any video data stored on the second member to the user with fast-forwarding disabled, together with the other limitations of the independent claims.

As to claim 6, the prior art of records fail to anticipate or suggest a video streaming system comprising:

a first portion of a virtual partition, the first portion containing previously-stored first video data,

a second portion of the virtual partition, the second portion containing previously--stored second video data;

a file system operable to access video data stored on the first and second portions of the virtual partition; and

a module operable to read the video data from the first and second portions of the virtual partition, the file system being configured to access the video data from the first and second portions of the virtual partition through the module, the module being configured to refuse a request to fast-forward any video data stored on the second portion and being configured to detect an attempt by a user to bypass the second video data from the second portion of the virtual partition with a fast-forward request and, notwithstanding the request, to transmit the second video data to the user, together with the other limitations of the independent claims.
